Mayor Donna Noade Reardon and Members of Common Council

Subject: American Iron and Metal (AIM)

Background:

American Iron and Metal (AIM), located at Port of Saint John, has long created operational conflict. Following consistent public outcry and two deaths within 7 months at the facility, the Saint John location remains one of the most unregulated and unsafe workplaces of the 98 various AIM sites worldwide.

It is time for AIM to step up and stop its Saint John operations and for the Province of New Brunswick to suspend its operating license until a new operating agreement is in place to protect the community and prioritize the safety of Saint John workers.

Motion:

RESOLVED that Common Council write a letter to the Premier, the responsible Minister, and all relevant provincial officials calling on their action specific to AIM's operations in order to protect workers and our community; including swift response to Worksafe NB's investigations and full implementation of their recommendations.

Respectfully Submitted,

(Received via email)

David Hickey
Ward 3 Councillor
City of Saint John
