

ENERGY MANAGEMENT POLICY STATEMENT

City of Saint Policy Statement

POLICY SECTION: UTILITIES & INFRASTRUCTURE

The City of Saint John Corporation will strive to be carbon neutral by 2040. To achieve this goal **The City of Saint John** will promote the efficient use of energy in its municipal and water facilities, systems, processes that consume energy, fleet, and equipment, as well as being committed to continually improving the energy performance within the scope of its Energy Management System, while also improving the performance of the Energy Management System. **The City of Saint John** will achieve this aim by:

- Providing the necessary information and prioritizing the resources to achieve our energy performance objectives and targets.
- Satisfying legal and other requirements related to energy use, energy consumption and energy efficiency.
- Continually improve energy performance and the Energy Management System.
- Establishing energy performance improvement objectives and targets within the organization’s annual business planning process.
- Supporting the procurement of energy efficient products and services that impact energy performance in a fiscally responsible manner.
- Considering energy performance during design and modification of its facilities, fleet, equipment, and processes in a fiscally responsible manner.
- Continue to educate and raise awareness among those impacted by the Energy Management System regarding the energy policy, objectives, and targets to reduce energy consumption and efforts to improve energy performance.
- Reducing greenhouse gas emissions from energy consumption and contributing towards mitigating the impacts of climate change.
- Minimizing the emissions from fossil fuel consumption with the use of alternative or renewal energy sources.

Purpose

The purpose of this policy is to state the Corporation of the City of Saint John’s commitment to mitigating climate change through energy conservation and reducing greenhouse gas emissions.

Scope

The scope of the City of Saint John Energy Management Plan applies to all new and existing municipal and water facilities, fleet vehicles and transit buses, and processes that consume energy
