

THE INTEGRATED HEALTH AGENDA

What is integrated health?

Interdisciplinary approach; bringing together biomedical sciences, social sciences and business education.

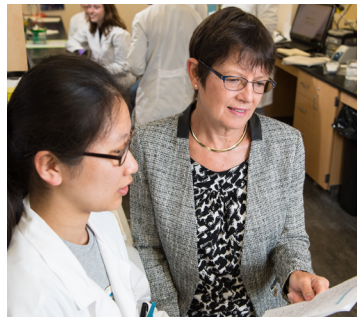

Focused on **reforming health care** for the people of New Brunswick and Canada.

Engaging partners, including Dalhousie Medicine NB, Horizon Health Network and New Brunswick Community College, in **meaningful collaborations**.

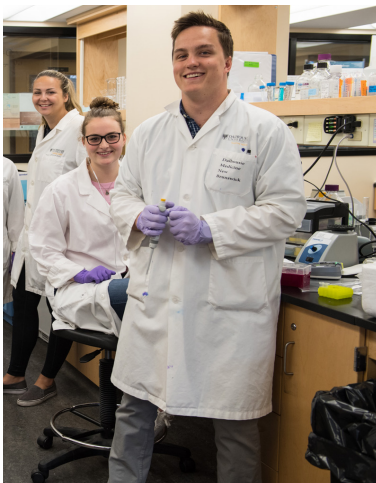

Educating bold thinkers to drive discovery and innovation, to implement **ground-breaking solutions** and to lead systemic reforms.

Clustering researchers in teams that make **cutting-edge discoveries** in technology, systems and policies while addressing issues of public concern.

Providing students with the **opportunities** to spearhead new developments in the health sector.

Interdisciplinary Health Education

Bachelor of Health

An interdisciplinary program designed by UNB Saint John's three faculties.

Three majors: Society and Health, Management in Health, Biomedical Sciences and Health.

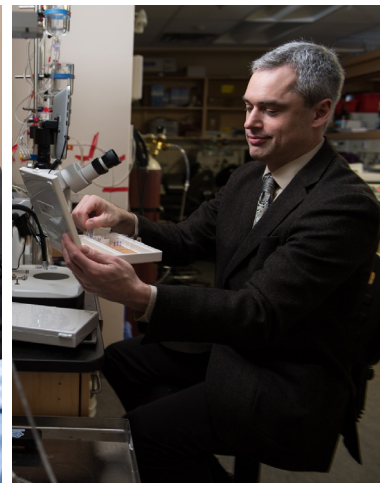

Accepting students now for September 2020.

Extracurricular Certificate in Health and Wellness

An enrichment program for all undergraduate students from any discipline.

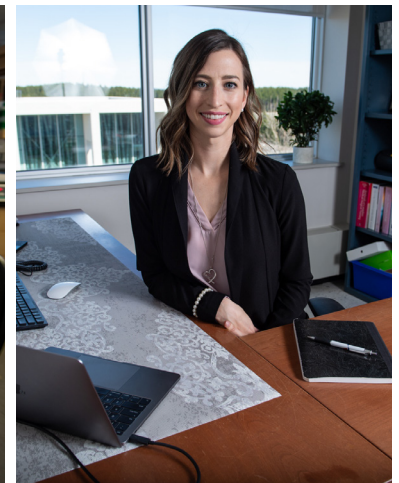

Features experiential learning and world-class speakers.

Masters in Health

An interdisciplinary graduate program in three areas: Healthy Community, Health Care Management, and Biomedical Sciences.

Two options: a course-based degree in one year, or a research-based degree in two years.

Masters of Business Administration

A course-based, one-year MBA with a specialization in Health Care Management.

Aimed at early and mid-career professionals.

Integrated Health Research

Innovation, Evidence-based Public Policy, Product Development and New Business Ventures

Centre for Integrated Health

Generating innovation of regional and national importance by harnessing the power of research clusters.

Five new, interdisciplinary and collaborative research units, led by world-class research chairs.

Complementary research programs with a mandate to translate knowledge and innovation into effective change in the health care system and the well-being of our citizens.

Expanding New Brunswick's knowledge economy and contributing to health care reform that improves services for every citizen.

Support for innovation

\$10M Early Stage Health Innovation Research Fund.

\$12M in new student scholarships, bursaries and graduate support.

The Health and Social Innovation Centre

UNB Saint John's Dynamic Centre of Learning

65,000 square feet, three-and-a-half storeys on the site of the former Ward Chipman Library, providing purpose-built, state-of-the-art teaching, learning and research space that fosters and supports collaboration, innovation, community engagement and entrepreneurship.
