Part 3b. Special Notes by Component

No Special Notes

Part 3c. Special Notes - Full Text

Note

Customer Note

Customer has not validated that all servers behind load balancers are identical and synchronized.

Part 4a. Scope Submitted by Scan Customer for Discovery

ASV Scan Report Summary

IP Address/ranges/subnets, domains, URLs, etc.

Domain: token.canadahelps.org

Domain: www.canadahelps.org

Part 4b. Scan Customer Designated "In-Scope" Components (Scanned)

IP Address/ranges/subnets, domains, URLs, etc.

52.233.56.161 (token.canadahelps.org)

172.86.186.99 (www.canadahelps.org)

Part 4c. Scan Customer Designated "Out-of-Scope" Components (Not Scanned)

IP Address/ranges/subnets, domains, URLs, etc.

No Data

ASV Scan Report Vulnerability Details

Part 1. Scan Information

| Scan Customer Company | CanadaHelps CanaDon | ASV Company | Trustwave Holdings, Inc. |
|-----------------------|---------------------|----------------------|--------------------------|
| Date Scan Completed | 2019-03-28 | Scan Expiration Date | 2019-06-26 |

Part 2. Vulnerability Details

The following issues were identified during this scan. Please review all items and address all that items that affect compliance or the security of your system.

In the tables below you can find the following information about each TrustKeeper finding.

- CVE Number The Common Vulnerabilities and Exposure number(s) for the detected vulnerability an industry standard for cataloging vulnerabilities. A comprehensive list of CVEs can be found at nvd.nist.gov or cve.mitre.org.
- Vulnerability This describes the name of the finding, which usually includes the name of the application or operating system that is vulnerable.
- CVSS Score The Common Vulnerability Scoring System is an open framework for communicating the characteristics and impacts of IT vulnerabilities. Further information can be found at www.first.org/cvss or nvd.nist.gov/cvss.cfm.
- Severity This identifies the risk of the vulnerability. It is closely associated with the CVSS score.
- Compliance Status Findings that are PCI compliance violations are indicated with a Fail status. In order to pass a vulnerability scan, these findings must be addressed.
 Most findings with a CVSS score of 4 or more, or a Severity of Medium or higher, will have a Fail status. Some exceptions exist, such as DoS vulnerabilities, which are not included in PCI compliance.
- Details TrustKeeper provides the port on which the vulnerability is detected, details about the vulnerability, links to available patches and other specific guidance on actions you can take to address each vulnerability.

For more information on how to read this section and the scoring methodology used, please refer to the appendix.

| | | | | | | key exchange phase. Using this algorithm enforces Forward Secrecy for secure communications with the server. CVSSv2: AV:N/AC:L/Au:N/C:N/I:N/A:N Service: http Application: nginx:nginx Evidence: Cipher Suite: TLSv1_2: DHE-RSA-AES256-GCM-SHA384 Cipher Suite: TLSv1_2: DHE-RSA-AES256-SHA256 Cipher Suite: TLSv1_2: DHE-RSA-AES256-SHA Cipher Suite: TLSv1_2: DHE-RSA-AES256-SHA Cipher Suite: TLSv1_2: DHE-RSA-AES128-GCM-SHA256 Remediation: No remediation is necessary. |
| 2 | | Enumerated SSL/TLS Cipher Suites | 0.00 | Info | Pass | Port: tcp/443 The finding reports the SSL cipher suites for each SSL/TLS service version provided by the remote service. This finding does not represent a vulnerability, but is only meant to provide visibility into the behavior and configuration of the remote SSL/TLS service. The information provided as part of this finding includes the SSL version (ex: TLSv1) as well as the name of the cipher suite (ex: RC4-SHA). A cipher suite is a set of cryptographic algorithms that provide authentication, encryption, and message authentication code (MAC) as part of an SSL/TLS negotiation and through the lifetime of the SSL session. It is typical that an SSL service would support multiple cipher suites. A cipher suite can be supported by across multiple SSL/TLS |

ASV Feedback Form

This form is used to review ASVs and their work product, and is intended to be completed after a PCI Scanning Service by the ASV client. While the primary audience of this form are ASV scanning clients (merchants or service providers), there are several questions at the end, under "ASV Feedback Form for Payment Brands and Others," to be completed as needed by Payment Brand participants, banks, and other relevant parties. This form can be obtained directly from the ASV during the PCI Scanning Service, or can be found online in a usable format at https://www.pcisecuritystandards.org. Please send this completed form to PCI SSC at: asv@pcisecuritystandards.org.

| ASV FEEDBACK FORM | | | | | |
